

Low emission zone / Augsburg started level 3 at 2016-06-01

Information for vehicle owners

On 1 January 2008 the cities of Berlin, Cologne and Hanover introduced low emission zones to mitigate air pollution caused by fine particles. The city of Augsburg started the first of July 2009.

Low emission zones are identified by traffic signs and additional signs. The Ordinance on the marking of vehicles (35th BImSchV) stipulates that vehicles have to be marked with stickers (on the windscreen inside the vehicle) and lays down the criteria vehicles have to meet for the different kinds of stickers. Stickers are valid for all low emission zones in any city in Germany.

An overview of low emission zones, both existing and planned, was drawn up by the Federal Environmental Agency (in German).

The city of Augsburg furthermore provides important information about her low emission zone on her website [Umweltzone - Stadt Augsburg](#) (size, exceptions, service, practical advice; unfortunately only in German).

Emissions groups

Vehicles are divided into emissions groups according to their particulate emissions and they receive a sticker of the colour marking the respective emissions group:

- red for emissions group 2,
- yellow for emissions group 3
- and green for emissions group 4.

Vehicles with green stickers (emissions group 4) or above may enter the currently existing low emission zone of Augsburg. Stickers are only mandatory for cars driven within this zone. They are not necessary for crossing the border into Germany.

Article 6 of the Ordinance on the marking of vehicles clearly lays down which vehicles belong to which emissions group. If registration papers do not identify the European emission standard of a vehicle, the date of the vehicle's first registration is used as a basis for classification. Vehicles with diesel engines can generally reach the next higher emissions group if they are retrofitted with an emission control device such as a particulate trap. Proof of the standard achieved through retrofitting (stipulated by the Ordinance on the marking of vehicles) must be provided in form of a certification issued by the garage.

Where to obtain emissions-control windscreen stickers

Stickers can be obtained from the local licensing administration (in Augsburg e.g. the 'administrative office for citizens' – Bürgeramt, An der Blauen Kappe 18, 86152 Augsburg) or other competent bodies designated under Länder law. Another option are bodies authorised to carry out waste gas examinations (garages, service stations with garages and inspection agencies such as Dekra and TÜV - Technical Inspection Authority - in Germany or even their offices abroad).

Stickers will be issued by any of the above-mentioned bodies upon presentation of vehicle registration papers.

It is also possible to order stickers from one of the above-mentioned bodies before driving into a low emission zone. Registration papers may be submitted (in principle copies do not need to

be officially certified) via fax or e-mail (scanned document) or as copy by post. The sticker will then be sent by post. The issuing bodies charge between 5 to 10 euro for one sticker. Costs for shipped stickers, including postage, may be higher.

Exemptions are possible in accordance with Article 1 (2) and Annex 3 to Article 2 (2) of the Ordinance on the marking of vehicles. Any application for exemption concerning the low emission zone of Augsburg can be addressed to the 'administrative office for citizens' – Bürgeramt, An der Blauen Kappe 18, 86152 Augsburg. It is not permitted to enter a low emission zone without a sticker or special authorisation (fine: 40 euro).

Overview of emissions groups for vehicles (exceptions to the rule may occur in individual cases):

European emission standard	Emissions group	First registration passenger car	First registration truck	Sticker
		Diesel engines	Diesel engines	
Euro 1 or less	1	before 1 January 1997	before 1 October 1996	none
Euro 2 or Euro 1 with retrofit	2	from 1 January 1997 to 31 December 2000	from 1 October 1996 to 30 September 2001	red
Euro 3 or Euro 2 with retrofit	3	from 1 January 2001 to 31 December 2005	from 1 October 2001 to 30 September 2006	yellow
Euro 4 and higher or Euro 3 with retrofit	4	from 1 January 2006	from 1 October 2006	green
		petrol / gas engines	petrol / gas engines	
Euro 1 or less (vehicles which do not meet group 4 criteria)	1	before 1 January 1993	before 1 January 1993	none
Euro 1 and higher or Annex XXIII to Road Traffic Registration Regulations (StVZO) or equivalent or 52nd Ordinance on derogations to the StVZO or equivalent	4	from 1 January 1993	from 1 January 1993	green
